So does the theory hold true? Has donut hole size changed, as the chart argues? Dunkin' Donuts and Krispy Kremes are thinner and have wider holes, so even today there are donuts that look like the ones from 1927 on the chart. The chartist has passion, but he might not have a lock on the facts.

“Aujourd’hui, du reste, l’explication naturelle des miracles est universellement abandonnée”

The Phoenician Calendar

The moon measured a year when the sky was dark. Lunar calendars predate solar and solars probably predate lunars. When people find artifacts it normally places them in a latitude. This Ponecian is Lunisolar.

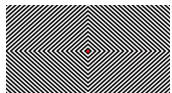

Skips, Hunks and Hunks a Junk

The Phoenician Sloop? Row ro roe your boat! Fish eggs and soup makes Vietnamese Pho! Congee is Pig and in Amrmenian congeniality, khoz is spelt **funq**. Hunker down pho Dàkuàitòu, the word in Vietcong that sounds as *Deck Waiter*

orbital distance fuses UV light at the geosphere, gravito magnetic. The sky is insurrect **[infrared]** at sunrise! Insolate aerosol resistance divides electromagnetic light into heat. Perpendicular (purrrle di-culm, in Italian is “for cull”). Pink (Velocity, fuschias) and dark blue (Magnetic Magentas) and Purrr Pull inbetween. Van Allen belts radiate, as radio.

SOLAR MAXIMUM AND MINIMUM

Birkland currents connect the Earth to the Sun, and when solar sunspots disappear, polarity reverses, collapsing the geospheres to half normal size! Cosmic rays being opportunistic burst through shieldings and saturate the atmosphere. This natural cycle enables pollen aerosols to ride dyne carrier waves, sea salts to corrode nearby structures and soot to pollute city streets. Aerosol’s root meaning is an arrow vector towards the sun.

HAMILTON NEXT TO COBURG 1850’s MAP

When war breaks out, sometimes people rename cities so approaching enemies cannot find valuable resources, such as steel mills, railyards and shipyards. Did Hamilton ever build submarines? Probably. Is it written in the history books? Considering war reparations are expensive and time consuming, probably not.

HOW WE SPENT THE AUTUMN ; OR , WANDERINGS IN BRITTANY

Dunlop , Madeline Anne Wallace LONDON : RICHARD BENTLEY, NEW BURLINGTON STREET, Publisher in Ordinary to Her Majesty. 1860. books.google.ca/books?id=UJKDAAAAYAAJ

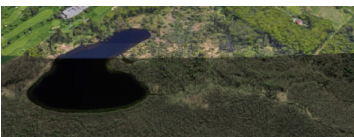

According to tradition , the magical looks of Eon were preserved by the inhabitants of Concoret ; those which the priests found were burnt : but at the death of the last sorcerer in this century , his books were hidden in a stream which cannot alter them : because, like the unfading fruits of the spot where still dwell the fairies and Druidesses, they are protected by talismans - so says the learned Abbé Mahé.

We might call Japan the Japanese, however they call themselves, Nippon. From Swahili, Nipo Sirenis translates to ニボシレニス Niposhirenisu, and that is a significant result using google translator. Sorcier from English translates to 魔術師 Majutsu-shi in Japanese. Sorcier from French translated to ウィザード U-izādo in Japanese. It’s as if there are two languages embedded within one. A modern pictoglyph and much more ancient runic script.

THE DEADPOOL : LAKE MEDAD : MOUNT NEMO : ONTARIO : KANNADA

Медад (Medad) is a Mongolian word. This is excerpt from a 1885 archeology bulletin:

“The Neutral Nation. A two column letter giving the leading facts known about the Neutrals. It also comments on statements made in the ‘Mail’, one week previous, in connection with a Masonic token found in an Indian grave at Halton, Co.” page. 73

Algonquin origin of the word
“Otinaouatoua.”

Translates to common speak as “Bad Water?” Or “OT INA WATAW”. Translates to GREEK AS ωτιναουάτου “What is a wataw?”. Perhaps, “What is in the Water?”

SMUDGING AND SMEARING AND DIAMOND SHOAL

On page 332, “ALEXANDER HENRY’S CAPTIVITY” from “Frost’s Pictorial History of Indian Wars and Captivities” it says “On the 18th of June, we crossed lake Aux Claies, which appeared to be upward of twenty miles in length. At its further end we came to the carrying-place of Toronto.” books.google.ca/books?id=efMacN44oysC

Now I searched and I searched and there is no Aux Claies, and certainly nowhere near Toronto. Aux is a word for Blondie, and Claies is a Clay, that’s C with a lay and in Edmonton there is a Eau Claire. See that map to the left, It’s marked Indian territory, and there’s no Indium anywhere to be seen. All I know is Auxtralians were in courts for years over “mines”, and a Bird in the Hand is Worth two in the bush, and alluvial Gold is a Diamond.

ANARCHISM AND AUTONOMIE AND COMMUNISMS

N. Buonaparte

Oreintal Emperor or Frankish *frakkr*. N. Buonaparte, born 1769, died 1821. The photo is taken from the book, where the word Napoleon isn’t written. Clearly a tall man, and quite possibly more than one. I count more than four. Hundred Days War is the 7th Conflict in the Napoleonic wars ending 1815. Some people stage war, and others wage war. This war cost a lot and to put an end to it, may have cost history even more. Oriental clothes and frankenstein’s nose, mixed with confederate style generalisms.

1814 ODE TO NAPOLEON BUONAPARTE

“Tis done—but yesterday a King And arm’d with Kings to strive— And now thou art a nameless thing So abject—yet alive. Is this the man of thousand thrones, Who strew’d our Earth with hostile bones, And can he thus survive? Since he, miscall’d the Morning Star, Nor man nor fiend hath fall’n so far.
